The Lely Commodus cubicle provides cows with the maximum animal welfare

Animal welfare, comfort and healthy, productive cows are strongly interlinked factors. Cubicles that offer the highest comfort and a good accessibility for lying down are being used more frequently for longer periods, which has a positive impact on the milk production.

The function of the cubicles is to create a clean environment for the cows. In many barns however, the existing cubicles are not designed for the present size of cows. In many types of cubicles cows have difficulty lying down because of too little lunge space or the pipes in the cubicles force the cows to lie in an awkward position. For these reasons, Lely has completely redesigned the cubicle concept and created a new animal-friendly cubicle, the Lely Commodus cubicle. The Commodus cubicle guides cows easily into their places and provides them with the maximum possible comfort.

Due to the flexible fixing of the cubicles, the Lely Commodus cubicle will not hurt cows when impacted. If, for example, a cow in heat jumps onto another cow that is in the act of lying down, the Commodus cubicle will give somewhat and return to its normal position after the impact. The flexible fixing will also soften the impact when a cow is rising up from an awkward position. The Commodus cubicle is a guiding cubicle rather than a fixed cubicle.

This intelligent new concept also enables a cow to adopt a lying position that is nearly as free as in the field. There are no side bars that could press on the cow's back and the front part of the cubicle leaves plenty of space for the head, which is necessary when lying down or standing up.

The new Lely Commodus cubicle is very quick and easy to install. The fixation module and the cubicle divider are two separate components. The width of the cubicle is also easy to change when the same cubicle is being used for heifers. All you need to do is loosen the fixing bolts and slide the cubicles to the required size. Commodus cubicles can also be quickly removed without tools. Because of their quick fixation and removal, Commodus cubicles can be removed temporarily, which sometimes makes it easier to help a sick cow out of a cubicle.

Lely Commodus cubicles are installed together with a rounded, long-lasting, flexible brisket board. The brisket board will not hinder the cow in any way, but will guide her to the right place. The cow can also easily put its front legs over the brisket board without hurting itself. Because of the raised position of the cubicle dividers, the distribution of bedding material, such as straw and sawdust and cleaning the cubicles is much easier than with traditional stalls. Mattresses are also easier to change or install with the modular brisket board construction.

The Lely Commodus cubicle offers the best characteristics in respect of animal welfare, comfort, accessibility and hygiene.

The Lely Commodus cubicle is a guiding cubicle rather than a fixed cubicle.

Live Life Lely

Since its establishment, Lely has always been committed to improving the quality of life of agricultural entrepreneurs as well as the future of the sector. In addition, the company is innovative in its products as well as its concepts for marketing and distribution.

- Lely is committed to helping farmers ahead of market developments
- Lely always supplies the most innovative products to farmers and contractors
- Lely provides customers with optimum customer service
- Everything Lely invents will always serve to make life easier for the benefit of both man and animal as well as providing joy to all our employees

In short: we at Lely do our work in order to serve farmers and to make their lives as enjoyable as possible. From grassland machinery to the automatic milking system, Lely thinks with the farmer and has offered him innovative solutions for the past 60 years.
